

Changes

Beta 7

- Added ability to clear all video thumbnail attachments and custom fields
- Disables the AYVP filter that overrides the post thumbnail
- Minor code reorganization
- New default thumbnail when using `video_thumbnail()`

Beta 6

- Added support for private Vimeo videos when API credentials are entered in settings
- Added support for Vimeo channel URLs
- Fixed more PHP 5.2 issues
- Settings backend overhauled
- Consolidated settings into a single database entry
- Basic functionality to handle settings upgrades

Beta 5

- Added a new test where markup can be scanned for thumbnails
- Added helpful information to the debugging page for troubleshooting issues
- Updated MPORA to support the new embed code and thumbnail URLs
- Improved Wistia support
- Fixed error on servers running PHP 5.2
- Began working on a settings overhaul

Beta 4

- Added CollegeHumor support
- Added Youku support (flash player and link detection)
- Added built-in support for the Automatic YouTube Video Posts plugin
- Added ‘video_thumbnail_providers’ filter so developers can add support for more video sites
- Added ‘new_video_thumbnail_url’ filter so developers can manually specify a thumbnail url before trying to scan markup
- Added ‘video_thumbnail_markup’ filter so developers can modify which markup is scanned for videos
- Removed cURL requirement
- Fixed bug that disabled saving as a featured image

Beta 3

- Added Wistia support
- Added provider tests to help automatically find bugs
- Higher resolution Vimeo thumbnails
- Added support for Facebook videos
- Video Thumbnails in the media library now have a custom field named ‘video_thumbnail’ with the value set to ‘1’
- Added test to show if theme supports post thumbnails

Beta 2

- Bugfix for “cannot redeclare class” error

Beta 1

- Added support for Funny or Die
- Added support for MPORA
- Added support for high resolution widescreen YouTube thumbnails (when available)
- Checks for error when uploading thumbnail so blank entries aren’t added to media library
- Better file names

Roadmap

- Add filters for regex arrays
- Possibly make “_video_thumbnail” custom field user changeable
- Remove “Smart YouTube Plugin” specific code from generic YouTube class
